Review Rule Summary

This expansion modified publication process.

The new Publication flow:

Step 1. Submitting. Research Action Cards can only be used for **submitting** Manuscripts.

Step 2. Peer Review. Submissions undergo a review process. Every other player plays a Peer-review Card on a count of three.

Step 3. Rebuttal. The author can play a rebuttal card to affect ratings or decisions.

Step 4. Tally up the results for final decision. An **accepted** submission requires a final rating above 5, n: player count, t: rebuttal bonus

$$t + \frac{1}{n}\sum_{i=0}^{n} r_i > 5, \qquad i.e.\ 5t + \sum_{i=0}^{n} r_i > 5 \cdot n$$

A **rejected** paper will be a preprint. A preprint can be resubmitted.

Step 5. End the review process by drawing Peer-review Cards.

Review Rule Summary

Defensing
The fifth Manuscript rule is modified to
fourth accepted or seven arbitrary.

About Peer-review Cards hand size.
Your hand size of this type of card is limited
to exactly three, replenish if consumed.

To publish a paper:
-> submitting
-> peer-review
-> rebuttal
-> final decision
